# CLIMATIZER RSE 3200

For drying and storage of lacquered screens

STORK PREPRINT SYSTEMS

## DRYING LACQUER ON SCREENS

After a lacquer coating has been applied to the screens, this lacquer must be dried. The RSE 3200 Climatizer can hold 9 screens of 64 cm repeat.

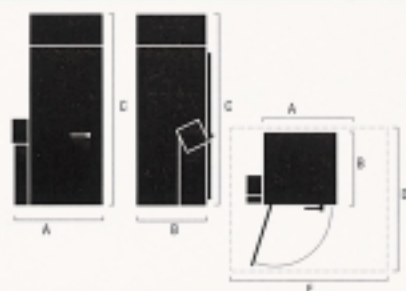

The design of the Climatizer is such that screens can be easily placed into and removed from the cabinet. The desired temperature and relative humidity can be easily set on the control panel. The subsequent drying process is completely automatic. The cabinet is equipped with an exhaust device, so that any solvent vapours released by the lacquer are discharged and do not get into working environment around the cabinet.

Thanks to its sound insulation the Stork Climatizer consumes little energy. Coated screens may be stored in the Climatizer for a couple of days prior to exposure.

## THE RSE 3200 CLIMATIZER

- Readily accessible and easy to open and close
- Simple and easy-to-view control panel
- Reproducible process
- Low energy consumption
- In accordance with CE safety standard

Dimensions in mm

	A	B	C
RSE 3210	1450	1220	3180
RSE 3220	1450	1220	4180
RSE 3230	1450	1220	4530

Installation area in mm

Max. screen length	D	E	Height
2080	2300	2500	3500
3050	2300	2500	4500
3500	2300	2500	4950

P = 7 KVA.

Room must be clean and dustless.
